

THE JOURNAL OF CELL BIOLOGY publishes reports of original observations on the behavior, structure, and function of cells and cell products. It is especially interested in bringing to the attention of its readers discoveries arising from the application of modern techniques. Manuscripts that attempt to correlate the findings of the biophysical and biochemical disciplines with physiological and morphological information are solicited. Comprehensive and timely review articles are also invited. The subscription price per year (four volumes) is \$50.00. Information regarding contributions and subscriptions is given in full on the inside back cover.

Editorial Board

H. G. CALLAN	CYRUS LEVINTHAL
