1. P. Ekblom. Formation of basement membranes in the embryonic kidney: an immunohistological study

11. W. E. Wright. Synthesis of rat myosin light chains in heterokaryons formed between undifferentiated rat myoblasts and chick skeletal myocytes

45. S. P. Sugrue and E. D. Hay. Response of basal epithelial cell surface and cytoskeleton to solubilized extracellular matrix molecules

55. M. Aikawa, L. H. Miller, J. R. Rabbege, and N. Epstein. Freeze-fracture study on the erythrocyte membrane during malarial parasite invasion

63. G. Liau, D. E. Ong, and F. Chytil. Interaction of the retinol/cellular retinol-binding protein complex with isolated nuclei and nuclear components

77. R. J. Mrany and S. Meizel. Potassium ion influx and Na$^+$ + K$^+$-ATPase activity are required for the hamster sperm acrosome reaction

113. C. O. Siegel, A. E. Jordan, and K. R. Miller. Addition of lipid to the photosynthetic membrane: effects on membrane structure and energy transfer

126. D. R. Janero and R. Barnnett. Thylakoid membrane biogenesis in Chlamydomonas reinhardtii 137$: cell cycle variations in the synthesis and assembly of polar glycerolipid

157. M. Chambard, J. Gabrion, and J. Mauchamp. Influence of collagen gel on the orientation of epithelial cell polarity: follicle formation from isolated thyroid cells and from preformed monolayers

175. F.-G. Falkner, H. Baumweber, and H. Biessmann. Two Drosophila melanogaster proteins related to intermediate filament proteins of vertebrate cells

201. S. Rosenberg, A. Stracher, and R. C. Lucas. Isolation and characterization of actin and actin-binding protein from human platelets

221. M. C. Pike and R. Snyderman. Alterations of new methylated phospholipid synthesis in the plasma membranes of macrophages exposed to chemotactants

227. E. F. Rossomando, E. G. Jahngen, B. Varnum, and D. R. Soll. Inhibition of a nutrient-dependent pinocytosis in Dictyostelium discoideum by the amino acid analog hadacidin

CONTENTS CONTINUED ON REVERSE OF THIS COVER
M. M. Salpeter and M. G. Farquhar. High-resolution analysis of the secretory pathway in mammotrophs of the rat anterior pituitary

C. E. Creutz. cis-Unsaturated fatty acids induce the fusion of chromaffin granules aggregated by synexin

W. D. Matthew, L. Tsavaler, and L. F. Reichardt. Identification of a synaptic vesicle specific membrane protein with a wide distribution in neuronal and neurosecretory tissue

D. R. Abrahamson and R. Rodewald. Evidence for the sorting of endocytic vesicle contents during the receptor-mediated transport of IgG across the newborn rat intestine

Rapid Communications

G. David and M. Bernfield. Type I collagen reduces the degradation of basal lamina proteoglycan by mammary epithelial cells

J. A. Ariano and A. I. Matus. Ultrastructural localization of cyclic GMP and cyclic AMP in rat striatum

J. Heath, S. Bell, and A. R. Rees. Appearance of functional insulin receptors during the differentiation of embryonal carcinoma cells

R. L. Gulley and T. S. Reese. Cytoskeletal organization at the postsynaptic complex

M. H. Johnson and C. A. Ziomek. Induction of polarity in mouse 8-cell blastomeres: specificity, geometry, and stability

M. K. Cheung, D. T. Drivas, V. C. Littau, and E. M. Johnson. Protein tightly bound near the termini of the Physarum extrachromosomal rDNA palindrome

D. J. Lundell, G. Yamanaka, and A. N. Glazer. A terminal energy acceptor of the phycobilisome: the 75,000-kdalton polypeptide of Synechococcus 6301 phycobilisomes—a new biliprotein

INFORMATION FOR SUBSCRIBERS

SUBSCRIPTIONS—The basic subscription price per year (four volumes, three issues each) for institutions and individuals is $160 ($200, as of January 1982). Members of The American Society for Cell Biology and students are eligible for the reduced rate of $80 ($90, as of January 1982). (Please add $26 for airmail surcharge to all European subscriptions [$30, as of January 1982].) Single copies are sold at $13.50 ($16.50, as of January 1982). Subscriptions, payable in advance, start with the first issue of the calendar year.

Payments and inquiries about membership in the American Society for Cell Biology should be addressed to Dr. Emma Shelton, Secretary, The American Society for Cell Biology, 9650 Rockville Pike, Bethesda, Md. 20814.

All other inquiries about subscriptions and back issues should be addressed to the Order Service of The Rockefeller University Press, 1230 York Avenue, New York 10021.

Remittances should be made by check or money order payable to The Rockefeller University Press and addressed to Post Office Box 5108, Church Street Station, New York 10249. All checks must be drawn on U. S. banks.

Claims for nonreceipt of issues will be honored when received within 3 months of mailing for U. S. A. subscribers, 6 months for foreign subscribers.

MICROFORM—Subscriptions and back copies from Vol. 1 on, are available in microfiche and microfilm through University Microfilms, 300 North Zeeb Road, Ann Arbor, Mich. 48106.
