Figure S1. Flow cytometric analysis of B cell development. Bone marrow cells from wild-type (WT), RAG1−/−:IgH:Bcl2, and Artemis−/−:IgH:Bcl2 were assessed by flow cytometry for expression IgM, B220, and CD43. Pre-B cells are IgM−B220lowCD43− and pro-B cells are IgM−B220lowCD43+. Immature B cells are B220highIgM+ and mature B cells are B220highIgM+. Data are representative of three mice of each genotype.
