Ruane et al., <http://www.jem.org/cgi/content/full/jem.20122762/DC1>

Figure S1. Gating strategy to identify and sort lung DCs. Cells were identified on the basis of forward and side scatter. Dead cells were excluded. Nonautofluorescent (dump-negative) hematopoietic (CD45+) cells were examined for the expression of CD11c and MHCII. CD11c^{hi}MHCII⁺ cells were classified into CD103⁺CD11b⁻ and CD103⁻CD11b⁺ DC subsets. CD103⁻CD11b⁺ cells were further classified into CD24⁺CD64⁻ and CD24⁻CD64⁺ subsets.
