

CONTENTS THE JOURNAL OF EXPERIMENTAL MEDICINE  
Volume 144 No. 5 November 1, 1976

---

- 1147 KEITH WHALEY and SHAUN RUDDY. Modulation of the alternative complement pathway by  $\beta$ 1H globulin
- 1164 CLAUDIA BEREK, B. A. TAYLOR, and K. EICHMANN. Genetics of the idiotype of BALB/c myeloma S117: multiple chromosomal loci for  $V_H$  genes encoding specificity for Group A streptococcal carbohydrate
- 1175 S. M. WAHL and D. L. ROSENSTREICH. Role of B lymphocytes in cell-mediated immunity. I. Requirement for T cells or T-cell products for antigen-induced B-cell activation
- 1188 ARNOLD E. POSTLETHWAITE, RALPH SNYDERMAN, and ANDREW H. KANG. The chemotactic attraction of human fibroblasts to a lymphocyte-derived factor
- 1204 JULIA W. ALBRIGHT and TAKASHI MAKINODAN. Decline in the growth potential of spleen-colonizing bone marrow stem cells of long-lived aging mice
- 1214 SUSAN SOLLIDAY RICH and ROBERT R. RICH. Regulatory mechanisms in cell-mediated immune responses. IV. Expression of a receptor for mixed lymphocyte reaction suppressor factor on activated T lymphocytes
- 1227 DENNIS E. VAN EPPS and RALPH C. WILLIAMS, JR. Suppression of leukocyte chemotaxis by human IgA myeloma components
- 1243 S. LOUIE, J. E. CURTIS, J. E. TILL, and E. A. MCCULLOCH. Antibodies in human sera to oncornavirus-like proteins from normal or leukemic marrow cell cultures
- 1254 SUSAN K. PIERCE and NORMAN R. KLINMAN. Allogeneic carrier-specific enhancement of hapten-specific secondary B-cell responses
- 1263 DAVID W. THOMAS and ETHAN M. SHEVACH. Nature of the antigenic complex recognized by T lymphocytes. I. Analysis with an in vitro primary response to soluble protein antigens
- 1274 HYUN S. SHIN, JAMES S. ECONOMOU, GARY R. PASTERNAK, ROBERT J. JOHNSON, and MICHAEL L. HAYDEN. Antibody-mediated suppression of grafted lymphoma. IV. Influence of time of tumor residency in vivo and tumor size upon the effectiveness of suppression by syngeneic antibody
- 1284 R. FAANES, M. WALKER, and Y. S. CHOI. Isoantiserum-augmented development of lymphocyte-mediated cytotoxicity
- 1294 STUART RUDIKOFF and J. LATHAM CLAFLIN. Expression of equivalent clonotypes in BALB/c and A/J mice after immunization with phosphorylcholine
- 1305 ION GRESSER, MICHAEL G. TOVEY, MARIE-THÉRÈSE BANDU, CHANTAL MAURY, and DANIELÉ BROUTY-BOYÉ. Role of interferon in the pathogenesis of virus diseases in mice as demonstrated by the use of anti-interferon serum. I. Rapid evolution of encephalomyocarditis virus infection
- 1316 ION GRESSER, MICHAEL G. TOVEY, CHANTAL MAURY, and MARIE-THÉRÈSE BANDU. Role of interferon in the pathogenesis of virus diseases in mice as demonstrated by the use of anti-interferon serum. II. Studies with herpes simplex, Moloney sarcoma, vesicular stomatitis, Newcastle disease, and influenza viruses
- 1324 K. YAMAZAKI, E. A. BOYSE, V. MIKÉ, H. T. THALER, B. J. MATHIESON, J. ABBOTT, J. BOYSE, Z. A. ZAYAS, and L. THOMAS. Control of mating preferences in mice by genes in the major histocompatibility complex
- 1336 E. LINDER, R. F. ANDERS, and J. B. NATVIG. Connective tissue origin of the amyloid-related protein SAA
- 1347 TAKUJI NARUSE, TAKUTA FUKASAWA, NAOYUKI HIROKAWA, SOSUKE OIKE, and YUZU MIYAKAWA. The pathogenesis of experimental membranous glomerulonephritis induced with homologous nephritogenic tubular antigen

CONTENTS CONTINUED ON REVERSE OF THIS COVER

# BRIEF DEFINITIVE REPORTS

- 1363 ROBERT B. LEVY, SAMUEL D. WAKSAL, and GENE M. SHEARER. Correlation of suppressor cell development in parental and F<sub>1</sub> hybrid mouse strains with the growth of a parental tumor in vivo
- 1369 DAVID W. SCOTT and CAROL ANN LONG. Role of self-carriers in the immune response and tolerance. I. B-cell unresponsiveness and cytotoxic T-cell immunity induced by haptenated syngeneic lymphoid cells
- 1375 BIRGITTA WÄHLIN, HEDVIG PERLMANN, and PETER PERLMANN. Analysis by a plaque assay of IgG- or IgM-dependent cytolytic lymphocytes in human blood
- 1381 U. HELLSTRÖM, M-L. DILLNER, S. HAMMARSTRÖM, and P. PERLMANN. Fractionation of human T lymphocytes on wheat germ agglutinin-Sepharose
- 1386 W. R. THOMAS, G. L. ASHERSON, and MADELEINE C. WATKINS. Reaginic antibody produced in mice with contact sensitivity

**PREPARATION OF MANUSCRIPT** Articles should conform to the style of a current issue of this journal or to the recommendations of the Style Manual for Biological Journals (3rd edition 1972, American Institute of Biological Sciences, 1401 Wilson Blvd., Arlington, Va. 22209). Note that each reference should contain the title of the pertinent citation. Please supply a brief title for a running head, not exceeding 57 characters and spaces. Only original typescript is acceptable for the printer; in addition, submit a fully legible carbon, mimeographed, or Xerox copy. Double space entire manuscript, including references, legends, footnotes, and tables.

**PREPARATION OF ILLUSTRATIONS** Label all illustrations (photographs, micrographs, charts, or drawings) sequentially with arabic numerals; designate them as figures. Number tables with roman numerals. In the margin of the manuscript, indicate approximately where each figure or table should appear.

**PAGE SIZE** The text block on each Journal page is 5 × 7¾ inches. Plan illustrations, including their legends, to fit within these dimensions after reduction. Avoid figures that exceed 5 inches in width unless they can fill the entire page, including margins. The maximum area for such full-page figures, including their legends, is 5½ × 8.

**LINE DRAWINGS** Provide original ink drawing (preferably 8½ × 11 inches maximum). These give the sharpest reproductions. The lettering should be sans serif, and of consistent size, and so planned that the size of the lettering is in scale with the size and complexity of the figures. Lettering and labeling should be large enough to permit reduction to a minimum size. Capital letters and numbers should be 1½ to 1¾ mm high after reduction.

**MICROGRAPHS** Micrographs should be planned so that they can be reproduced same size (not reduced). Figure numbers and lettering should be 2½ to 3 mm high in sans serif style. If authors are unable to provide figures labeled satisfactorily, the Press will label them; in this case, the author must provide an overlay or diagram to show exactly where such labeling should appear.

In general, limit the field of a micrograph to the regions and structures discussed in the report; eliminate irrelevant structures or expanses. Cropping unnecessary areas from micrographs saves space and expense. If a micrograph must be specifically oriented, mark "top" on the back of the print.

Micrographs that are grouped should be of uniform size and shape, with the edges of the prints touching. The engraver will tool thin white lines between figures. Plan the over-all size of the grouping so the legend will fit below the composite; if the grouping occupies a full page, the legend will appear at the foot of the facing page. The Journals Office prefers that multiple photographs be submitted unmounted with a diagram showing the desired layout.
