

CONTENTS THE JOURNAL OF EXPERIMENTAL MEDICINE

Volume 156 No. 4 October 1, 1982

-
- 945 ANNA SZURO-SUDOL and CARL F. NATHAN. Suppression of macrophage oxidative metabolism by products of malignant and nonmalignant cells
- 962 DOROTHY YUAN and PHILIP W. TUCKER. Effect of lipopolysaccharide stimulation on the transcription and translation of messenger RNA for cell surface immunoglobulin M
- 975 STANLEY J. KORSMEYER, PHILIP A. HIETER, SUSAN O. SHARROW, CAROLYN K. GOLDMAN, PHILIP LEDER, and THOMAS A. WALDMANN. Normal human B cells display ordered light chain gene rearrangements and deletions
- 986 CONTANTIN A. BONA, SCOTT FINLEY, STANLEY WATERS, and H. G. KUNKEL. Anti-immunoglobulin antibodies. III. Properties of sequential anti-idiotypic antibodies to heterologous anti- γ globulins. Detection of reactivity of anti-idiotypic antibodies with epitopes of Fc fragments (homobodies) and with epitopes and idiotopes (epibodies)
- 1000 DAVID I. BELLER, TIMOTHY A. SPRINGER, and ROBERT D. SCHREIBER. Anti-Mac-1 selectively inhibits the mouse and human by the type three complement receptor
- 1010 HIROMI KUBAGAWA, MITSUFUMI MAYUMI, JOHN F. KEARNEY, and MAX D. COOPER. Immunoglobulin V_H determinants defined by monoclonal antibodies
- 1025 JAMES L. URBAN, J. MICHAEL HOLLAND, MARGARET L. KRIPKE, and HANS SCHREIBER. Immunoselection of tumor cell variants by mice suppressed with ultraviolet radiation
- 1042 ANNE M. MACKEL, FRANK DELUSTRO, and E. CARWILE LEROY. Cross-reactivity of cell-mediated immunity between interstitial (type I) and basement membrane (type IV) collagens
- 1057 GERALD E. RANGES, MARGRIT P. SCHEID, GIDEON GOLDSTEIN, and EDWARD A. BOYSE. T cell development in normal and thymopentin-treated nude mice
- 1065 WILLIAM E. BIDDISON, PATRICIA E. RAO, MARY ANNE TALLE, GIDEON GOLDSTEIN, and STEPHEN SHAW. Possible involvement of the OKT4 molecule in T cell recognition of class II HLA antigens. Evidence from studies of cytotoxic T lymphocytes specific for SB antigens
- 1077 CAROL A. ROUZER, WILLIAM A. SCOTT, ANNE L. HAMILL, FU-TONG LIU, DAVID H. KATZ, and ZANVIL A. COHN. Secretion of leukotriene C and other arachidonic acid metabolites by macrophages challenged with immunoglobulin E immune complexes
- 1087 ARTO NEMLANDER, ANU SOOTS, EEVA VON WILLEBRAND, BO HUSBERG, and PEKKA HÄYRY. Redistribution of renal allograft-responding leukocytes during rejection. II. Kinetics and specificity
- 1101 GILLA KAPLAN and GUSTAV GAUDERNACK. In vitro differentiation of human monocytes. Differences in monocyte phenotypes induced by cultivation on glass or on collagen
- 1115 HIROSHI KIYONO, JERRY R. MCGHEE, LISA M. MOSTELLER, JOHN H. ELDRIDGE, WILLIAM J. KOOPMAN, JOHN F. KEARNEY, and SUZANNE M. MICHALEK. Murine Peyer's patch T cell clones. Characterization of antigen-specific helper T cells for immunoglobulin A responses
- 1131 DALE E. YELTON and MATTHEW D. SCHARFF. Mutant monoclonal antibodies with alterations in biological functions
- 1149 SAMUEL D. WRIGHT and SAMUEL C. SILVERSTEIN. Tumor-promoting phorbol esters stimulate C3b and C3b' receptor-mediated phagocytosis in cultured human monocytes
- 1165 JAMES B. DALE and EDWIN H. BEACHEY. Protective antigenic determinant of streptococcal M protein shared with sarcolemmal membrane protein of human heart
- 1177 DAVID E. BRILES, COLYNN FORMAN, SUSAN HUDAK, J. LATHAM CLAFLIN. Anti-phosphorylcholine antibodies of the T15 idiotypic are optimally protective against *Streptococcus pneumoniae*
- 1186 BARBARA N. BECK, JOHN G. FRELINGER, MINORU SHIGETA, ANTHONY J. INFANTE, D. CUMMINGS, G. HÄMMERLING, and C. GARRISON FATHMAN. T cell clones specific for hybrid I-A molecules. Discrimination with monoclonal anti-I-A^b antibodies
- 1195 DAVID J. GRUNWALD, KENNETH MILLER, and REX RISSER. P80: a tumor-related protein found in many lymphomas of mice
- 1210 WILLIAM D. SOPER, SCOTT P. BARTLETT, and HENRY J. WINN. Lysis of antibody-coated cells by platelets

- 1222 J. Y. DJEU, N. STOCKS, K. ZOON, G. J. STANTON, T. TIMONEN, and R. B. HERBERMAN. Positive self regulation of cytotoxicity in human natural killer cells by production of interferon upon exposure to influenza and herpes viruses
- 1235 G. R. HARRIMAN, E. R. PODACK, A. I. BRAUDE, L. C. CORBEIL, A. F. ESSER, and J. G. CURD. Activation of complement by serum-resistant *Neisseria gonorrhoeae*. Assembly of the membrane attack complex without subsequent cell death

BRIEF DEFINITIVE REPORTS

- 1250 WERNER SOLBACH. Tumor-promoting phorbol esters selectively abrogate the expression of the T4 differentiation antigen expressed on normal and malignant (Sézary) T helper lymphocytes
- 1256 JOHN S. COWDERY, MICHAEL F. CURTIN, JR., and ALFRED D. STEINBERG. Effect of prior intragastric antigen administration on primary and secondary anti-ovalbumin responses of C57Bl/6 and NZB mice
- 1262 SEYMOUR J. KLEBANOFF. The iron-H₂O₂-iodide cytotoxic system
- 1268 CHRISTIANE RORDORF, H. P. SCHNEBLI, MARILYN L. BALTZ, GLENYS A. TENNENT, and M. B. PEPYS. The acute-phase response in (NZB × NZW)_F₁ and MRL/1 mice. Contrasting patterns resembling those in human systemic lupus erythematosus and rheumatoid arthritis, respectively
- 1274 AYA JAKOBOVITS, NATHAN SHARON, and ISRAEL ZAN-BAR. Acquisition of mitogenic responsiveness by nonresponding lymphocytes upon insertion of appropriate membrane components
- 1280 HOWARD D. ENGERS, ANDREW L. GLASEBROOK, and GEORGE D. SORENSON. Allogeneic tumor rejection by the intravenous injection of Lyt-2⁺ cytolytic T lymphocyte clones
- 1286 TADAYOSHI TANIYAMA and TAKESHI WATANABE. Establishment of a hybridoma secreting a monoclonal antibody specific for activated tumoricidal macrophages

COPYEDITING AND PRODUCTION *Diane Levitt and Michael Neubarth*

PREPARATION OF MANUSCRIPT Articles should conform to the style of a current issue of this journal or to the recommendations of the *Council of Biology Editors Style Manual* (4th edition, 1978, American Institute of Biological Sciences, 1401 Wilson Blvd., Arlington, Va. 22209). Note that each reference should contain the title of the pertinent citation. Please supply a brief title for a running head, not exceeding 57 characters and spaces, with no abbreviations. Only original typescript is acceptable for the printer; in addition, submit a fully legible carbon, mimeographed, or Xerox copy. Double space entire manuscript, including references, legends, footnotes, and tables.

PREPARATION OF ILLUSTRATIONS Label all illustrations (photographs, micrographs, charts, or drawings) sequentially with arabic numerals; designate them as figures. Number tables with roman numerals. In the margin of the manuscript, indicate approximately where each figure or table should appear.

PAGE SIZE The text block on each Journal page is 5 × 7¼ inches. Plan illustrations, including their legends, to fit within these dimensions after reduction. Avoid figures that exceed 5 inches in width unless they can fill the entire page, including margins. The maximum area for such full-page figures, including their legends, is 5½ × 8.

LINE DRAWINGS Provide original ink drawing (preferably 8½ × 11 inches maximum). These give the sharpest reproductions. The lettering should be sans serif, and of consistent size, and so planned that the size of the lettering is in scale with the size and complexity of the figures. Lettering and labeling should be large enough to permit reduction to a minimum size. Capital letters and numbers should be 1½ to 1¾ mm high after reduction.

MICROGRAPHS Micrographs should be planned so that they can be reproduced same size (not reduced). Figure numbers and lettering should be 2½ to 3 mm high in sans serif style. If authors are unable to provide figures labeled satisfactorily, the Press will label them; in this case, the author must provide an overlay or diagram to show exactly where such labeling should appear.

In general, limit the field of a micrograph to the regions and structures discussed in the report; eliminate irrelevant structures or expanses. Cropping unnecessary areas from micrographs saves space and expense. If a micrograph must be specifically oriented, mark "top" on the back of the print.

Micrographs that are grouped should be of uniform size and shape, with the edges of the prints touching. The engraver will tool thin white lines between figures. Plan the over-all size of the grouping so the legend will fit below the composite; if the grouping occupies a full page, the legend will appear at the foot of the facing page. The Journals Office prefers that multiple photographs be submitted unmounted with a diagram showing the desired layout.
