

CONTENTS THE JOURNAL OF EXPERIMENTAL MEDICINE

Volume 157 No. 5 May 1, 1983

- 1369 PIERRE-OLIVIER COURAUD, BAO-ZHANG LÜ, and A. DONNY STROSBERG. Cyclical antiidiotypic response to anti-hormone antibodies due to neutralization by autologous anti-antiidiotypic antibodies that bind hormone
- 1379 MUTSUHIKO MINAMI, KENJI OKUDA, SHUICHI FURUSAWA, and MARTIN E. DORF. Analysis of T cell hybridomas. IV. Characterization of inducible suppressor cell hybridomas
- 1396 BARBARA N. BECK, PATRICIA A. NELSON, and C. GARRISON FATHMAN. The I-A^b mutant B6.C-H-2^{bm12} allows definition of multiple T cell epitopes on I-A molecules
- 1405 JOHN SWANSON and OSMAR BARRERA. Immunological characteristics of gonococcal outer membrane protein II assessed by immunoprecipitation, immunoblotting, and coagglutination
- 1421 JOHN E. COE and MARY JANE ROSS. Hamster female protein. A divergent acute phase protein in male and female Syrian hamsters
- 1434 JONATHAN R. LAMB, BARRY J. SKIDMORE, NICOLA GREEN, JACQUES M. CHILLER, and MARC FELDMANN. Induction of tolerance in influenza virus-immune T lymphocyte clones with synthetic peptides of influenza hemagglutinin
- 1448 CHARLES D. MILLS and ROBERT J. NORTH. Expression of passively transferred immunity against an established tumor depends on generation of cytolytic T cells in recipient. Inhibition by suppressor T cells
- 1461 ROBERT C. GILES, GABRIEL NUNEZ, CAROLYN KATOVICH HURLEY, ANTONIO NUNEZ-ROLDAN, ROBERT WINCHESTER, PETER STASTNY, and J. DONALD CAPRA. Structural analysis of a human I-A homologue using a monoclonal antibody that recognizes an MB3-like specificity
- 1471 VIRGINIA L. SHEPHERD, PHILIP D. STAHL, PAULETTE BERND, and MICHEL RABINOVITCH. Receptor-mediated entry of β -glucuronidase into the parasitophorous vacuoles of macrophages infected with *Leishmania mexicana amazonensis*
- 1483 GUNTHER DENNERT and ECKHARD R. PODACK. Cytolysis by H-2-specific T killer cells: assembly of tubular complexes on target membranes
- 1496 DAVID E. HARRISON. Long-term erythropoietic repopulating ability of old, young, and fetal stem cells
- 1505 DONALD BELLGRAU. Induction of cytotoxic T cell precursors in vivo. Role of T helper cells
- 1516 MART MANNIK, LAWRENCE Y. C. AGODOA, and KENNETH A. DAVID. Rearrangement of immune complexes in glomeruli leads to persistence and development of electron-dense deposits
- 1529 MAUREEN HOWARD, STEVEN B. MIZEL, LAWRENCE LACHMAN, JOHN ANSEL, BARBARA JOHNSON, and WILLIAM E. PAUL. Role of interleukin 1 in anti-immunoglobulin-induced B cell proliferation
- 1544 GAIL ABENDROTH BISHOP, JOSEPH C. GLORIOSO, and STANLEY A. SCHWARTZ. Relationship between expression of herpes simplex virus glycoproteins and susceptibility of target cells to human natural killer activity
- 1562 D. A. LEPAY, N. NOGUEIRA, and Z. COHN. Surface antigens of *Leishmania donovani* promastigotes
- 1573 JÉRÔME PÈNE, FAWZIA BEKKHOUCHA, CATHERINE DESAYMARD, HABIB ZAGHOUBANI, and MARC STANISLAWSKI. Induction of a cross-reactive idiotype dextran-positive antibody response in two Igh-C^b mouse strains treated with anti-J558 cross-reactive idiotype antibodies
- 1594 PETER J. HOTEZ and ANTHONY CERAMI. Secretion of a proteolytic anticoagulant by *Ancylostoma* hookworms
- 1604 H. VAN LOVEREN, R. MEADE, and P. W. ASKENASE. An early component of delayed-type hypersensitivity mediated by T cells and mast cells
- 1618 KENNETH L. ROCK and BARUJ BENACERRAF. Inhibition of antigen-specific T lymphocyte activation by structurally related Ir gene-controlled polymers. Evidence of specific competition for accessory cell antigen presentation
- 1635 EDMOND A. GOIDL, JANET W. CHOY, JAMES J. GIBBONS, MARC E. WEKSLER, G. JEANETTE THORBECKE, and GREGORY W. SISKIND. Production of auto-antiidiotypic antibody during the normal immune response. VII. Analysis of the cellular basis for the increased auto-antiidiotypic antibody production by aged mice

CONTENTS CONTINUED ON REVERSE OF THIS COVER

- 1646 DAVID M. SPALDING, WILLIAM J. KOOPMAN, JOHN H. ELDRIDGE, JERRY R. MCGHEE, and RALPH M. STEINMAN. Accessory cells in murine Peyer's patch. I. Identification and enrichment of a functional dendritic cell
- 1660 JONATHAN P. STOYE and CHRISTOPH MORONI. Endogenous retrovirus expression in stimulated murine lymphocytes. Identification of a new locus controlling mitogen induction of a defective virus

BRIEF DEFINITIVE REPORTS

- 1675 STEVEN M. FRIEDMAN and GARY S. THOMPSON. Functionally restricted, allospecific, human helper T cell lines that amplify either B cell or cytolytic T cell responses
- 1681 RUTH EPSTEIN, KATHERIN LEHMANN, and MELVIN COHN. Induction of λ_1 -immunoglobulin is determined by a regulatory gene ($r_{\lambda 1}$) linked (or identical) to the structural ($c_{\lambda 1}$) gene
- 1687 JEFFREY P. GRONER, ANDREW J. WATSON, and FRITZ H. BACH. Dw/LD-related molecular polymorphism of DR4 β -chains
- 1692 JOHN H. KEHRL and ANTHONY S. FAUCI. Identification, purification, and characterization of antigen activated and antigen-specific human B lymphocytes
- 1698 ROBERT P. KIMBERLY, ALLAN GIBOFISKY, JANE E. SALMON, and MARILENA FOTINO. Impaired Fc-mediated mononuclear phagocyte system clearance in HLA-DR2 and MT1-positive healthy young adults
- 1704 DAVID A. HUME and SIAMON GORDON. Mononuclear phagocyte system of the mouse defined by immunohistochemical localization of antigen F4/80. Identification of resident macrophages in renal medullary and cortical interstitium and the juxtaglomerular complex

COPYEDITING AND PRODUCTION *Diane Levitt and Heather Libbey*

PREPARATION OF MANUSCRIPT Articles should conform to the style of a current issue of this journal or to the recommendations of the *Council of Biology Editors Style Manual* (4th edition, 1978, American Institute of Biological Sciences, 1401 Wilson Blvd., Arlington, Va. 22209). Note that each reference should contain the title of the pertinent citation. Please supply a brief title for a running head, not exceeding 57 characters and spaces, with no abbreviations. Only original typescript is acceptable for the printer; in addition, submit a fully legible carbon, mimeographed, or Xerox copy. Double space entire manuscript, including references, legends, footnotes, and tables.

PREPARATION OF ILLUSTRATIONS Label all illustrations (photographs, micrographs, charts, or drawings) sequentially with arabic numerals; designate them as figures. Number tables with roman numerals. In the margin of the manuscript, indicate approximately where each figure or table should appear.

PAGE SIZE The text block on each Journal page is $5 \times 7\frac{1}{4}$ inches. Plan illustrations, including their legends, to fit within these dimensions after reduction. Avoid figures that exceed 5 inches in width unless they can fill the entire page, including margins. The maximum area for such full-page figures, including their legends, is $5\frac{1}{2} \times 8$.

LINE DRAWINGS Provide original ink drawing (preferably $8\frac{1}{2} \times 11$ inches maximum). These give the sharpest reproductions. The lettering should be sans serif, and of consistent size, and so planned that the size of the lettering is in scale with the size and complexity of the figures. Lettering and labeling should be large enough to permit reduction to a minimum size. Capital letters and numbers should be $1\frac{1}{2}$ to $1\frac{3}{4}$ mm high after reduction.

MICROGRAPHS Micrographs should be planned so that they can be reproduced same size (not reduced). Figure numbers and lettering should be $2\frac{1}{2}$ to 3 mm high in sans serif style. If authors are unable to provide figures labeled satisfactorily, the Press will label them; in this case, the author must provide an overlay or diagram to show exactly where such labeling should appear.

In general, limit the field of a micrograph to the regions and structures discussed in the report; eliminate irrelevant structures or expanses. Cropping unnecessary areas from micrographs saves space and expense. If a micrograph must be specifically oriented, mark "top" on the back of the print.

Micrographs that are grouped should be of uniform size and shape, with the edges of the prints touching. The engraver will tool thin white lines between figures. Plan the over-all size of the grouping so the legend will fit below the composite; if the grouping occupies a full page, the legend will appear at the foot of the facing page. The Journals Office prefers that multiple photographs be submitted unmounted with a diagram showing the desired layout.
