

Ras-MAP Kinase Signaling

Are you sure you know what's in that recent shipment of sphingolipids? From Avanti there's no question - if it's not >99% we don't ship!

Lysophosphatidic Acid
Avanti Catalog No. 857130

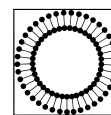

Sphingosine-1-phosphate
Avanti Catalog No. 860492

Lysophosphatidic acid (LPA) and sphingosine-1-phosphate (S1P) are extracellular lipid mediators that signal through distinct members of the Edg/LP subfamily of G protein-coupled receptors (GPCRs). LPA and S1P receptors are expressed in almost every cell type and can couple to multiple G proteins [G(i), G(q) and G(12/13)] to mediate a great variety of responses, ranging from rapid morphological changes to long-term stimulation of cell proliferation. LPA serves as the prototypic GPCR agonist that activates the small GTPases Ras [via G(i)] and RhoA [via G(12/13)], leading to activation of the mitogen-activated protein kinase (MAPK) cascade and reorganization of the actin cytoskeleton, respectively. This review focuses on our current insights into how Ras-MAPK signaling is regulated by GPCR agonists in general, and by LPA in particular.

Kranenburg, O. and W.H. Moolenaar. (2001). Ras-MAP kinase signaling by lysophosphatidic acid and other G protein-coupled receptor agonists. *Oncogene* 20:1540-6.

THE
JOURNAL OF
EXPERIMENTAL
MEDICINE

Bonus Meeting Distribution For Your Ad . . .

*There will be bonus distribution of
THE JOURNAL OF EXPERIMENTAL MEDICINE
at the following meetings:*

- **Experimental Biology 2002**
(April 21-23, New Orleans) • *April 1 and April 15 issues*
- **Medical Library Association**
(May 17-23, Dallas) • *May 6 issue*
- **American Society for Microbiology**
(May 19-22, Salt Lake City) • *May 6 issue*
- **Special Libraries Association**
(June 8-13, Los Angeles) • *May 20 issue*
- **American Library Association, Summer Meeting**
(June 13-19, Atlanta) • *June 3 issue*
- **ELSO (European Life Sciences Organisation)**
(June 29 and 30, Nice) • *May 20 issue*

**Materials are due
one month before
issue dates.**
