

No. 2, AUGUST 1, 1936

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| HEIDELBERGER, MICHAEL, and KENDALL, FORREST E. Quantitative studies on antibody purification. I. The dissociation of precipitates formed by pneumococcus specific polysaccharides and homologous antibodies. | 161 |
| KRAMER, S. D., SOBEL, A. E., GROSSMAN, L. H., and HOSKWITH, B. Survival of the virus of poliomyelitis in the oral and nasal secretion of convalescents. | 173 |
| TRAUB, ERICH. The epidemiology of lymphocytic choriomeningitis in white mice. | 183 |
| GOODNER, KENNETH, and HORSFALL, FRANK L., JR. The complement fixation reaction with pneumococcus capsular polysaccharide. | 201 |
| COX, HERALD R., and OLITSKY, PETER K. Active immunization of guinea pigs with the virus of equine encephalomyelitis. III. Quantitative studies of serum antiviral bodies in animals immunized with active and inactive virus. | 217 |
| COX, HERALD R., and OLITSKY, PETER K. Active immunization of guinea pigs with the virus of equine encephalomyelitis. IV. Effect of immune serum on antigenicity of active and inactive virus. | 223 |
| HARROP, GEORGE A., NICHOLSON, WILLIAM M., and STRAUSS, MARGARET. Studies on the suprarenal cortex. V. The influence of the cortical hormone upon the excretion of water and electrolytes in the suprarenalectomized dog. | 233 |
| HUGGINS, CHARLES, and BLOCKSOM, B. H., JR. Changes in outlying bone marrow accompanying a local increase of temperature within physiological limits. Plates 13 to 16. | 253 |

|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| HUGGINS, CHARLES, and NOONAN, W. J. An increase in reticulo- endothelial cells in outlying bone marrow consequent upon a local increase in temperature. Plates 17 to 19. | 275 |
| SHAFFER, MORRIS F., ENDERS, JOHN F., and WU, CHAO-JEN. Studies on natural immunity to pneumococcus Type III. II. Certain distinguishing properties of two strains of pneu- mococcus Type III varying in their virulence for rabbits, and the reappearance of these properties following R→S recon- version of their respective rough derivatives. Plate 20. | 281 |
| ENDERS, JOHN F., SHAFFER, MORRIS F., and WU, CHAO-JEN. Studies on natural immunity to pneumococcus Type III. III. Correlation of the behavior <i>in vivo</i> of pneumococci Type III varying in their virulence for rabbits with certain differ- ences observed <i>in vitro</i> . Plate 21. | 307 |
