

# CONTENTS

No. 1, JANUARY 1, 1942

	PAGE
TRASK, JAMES D., and PAUL, JOHN R. Periodic examination of sewage for the virus of poliomyelitis. . . . .	1
KIDD, JOHN G. The enduring partnership of a neoplastic virus and carcinoma cells. Continued increase of virus in the V2 carcinoma during propagation in virus-immune hosts. . . . .	7
EATON, MONROE D., MARTIN, WALTER P., and BECK, M. DORTHY. The antigenic relationship of the viruses of meningopneumonitis and lymphogranuloma venereum. . . . .	21
HEIDELBERGER, MICHAEL, KABAT, ELVIN A., and MAYER, MANFRED. A further study of the cross-reaction between the specific polysaccharides of Types III and VIII pneumococci in horse antisera. . . . .	35
HIRST, GEORGE K. The quantitative determination of influenza virus and antibodies by means of red cell agglutination. . . . .	49
HOWE, CALDERON. Demonstration of agglutinins for <i>Bartonella bacilliformis</i> . . . . .	65
CURNEN, EDWARD C., and MACLEOD, COLIN M. The effect of sulfapyridine upon the development of immunity to pneumococcus in rabbits. . . . .	77
HOUSSAY, B. A., SMYTH, F. S., FOGLIA, V. G., and HOUSSAY, A. B. Comparative diabetogenic action of the hypophysis from various animals. . . . .	93
SABIN, ALBERT B., and WARD, ROBERT. The natural history of experimental poliomyelitis infection. I. Studies on the centrifugal spread and elimination of virus in intrasciatically inoculated <i>rhesus</i> monkeys. . . . .	107
SHEDLOVSKY, THEODORE, and SCUDDER, JOHN. A comparison of erythrocyte sedimentation rates and electrophoretic patterns of normal and pathological human blood. . . . .	119
FRIEDMAN, MEYER, and KAPLAN, A. Studies concerning the site of renin formation in the kidney. I. The absence of renin in the aglomerular kidney of the midshipman fish. Plate 1. . . . .	127
