

No. 3, MARCH 1, 1953

ACKERMANN, W. WILBUR, and JOHNSON, R. BERNAL. Some energy relations in a host-virus system.	315
HIRSCH, JAMES G. The antimycobacterial activity of various amines re- lated to spermine in chemical structure.	323
HIRSCH, JAMES G. The essential participation of an enzyme in the in- hibition of growth of tubercle bacilli by spermine.	327

	PAGE
HIRSCH, JAMES G. Spermine oxidase: an amine oxidase with specificity for spermine and spermidine.	345
DUBOS, RENÉ J. Effect of the composition of the gaseous and aqueous environments on the survival of tubercle bacilli <i>in vitro</i>	357
MELNICK, JOSEPH L., and KAPLAN, ALBERT S. Quantitative studies of the virus-host relationship in chimpanzees after inapparent infection with Cocksackie viruses. I. The virus carrier state and the development of neutralizing antibodies.	367
KRAFT, LISBETH M., and MELNICK, JOSEPH L. Quantitative studies of the virus-host relationship in chimpanzees after inapparent infection with Cocksackie viruses. II. The development of complement-fixing antibodies.	401
HARTROFT, PHYLLIS MERRITT, and HARTROFT, W. STANLEY. Studies on renal juxtaglomerular cells. I. Variations produced by sodium chloride and desoxycorticosterone acetate. Plate 20.	415
SCHWARTZ, IRVING L., THAYSEN, JØRN HESS, and DOLE, VINCENT P. Urea excretion in human sweat as a tracer for movement of water within the secreting gland.	429
JEMSKI, JOSEPH V., FLICK, JOHN A., and STINEBRING, WARREN R. Studies on the activation of serum protease by an antigen-antibody system.	439
FABER, HAROLD K., SILVERBERG, ROSALIE J., and DONG, LUTHER. Studies on entry and egress of poliomyelitic infection. VI. Centrifugal spread of the virus into peripheral nerve: with notes on its possible implications.	455
