

General Physiology is the study of biological mechanisms through analytical investigations, which decipher the molecular and cellular mechanisms underlying biological function at all levels of organization.

The mission of the *Journal of General Physiology* is to publish articles that elucidate important biological, chemical, or physical mechanisms of broad physiological significance.

## Generally Physiological

- 417 Of pumps, protons, chloride gradients, and microvesicles at the immunological synapse. Elizabeth M. Adler

## Reviews

- 419 Structural diversity of ABC transporters. Josy ter Beek, Albert Guskov, and Dirk Jan Slotboom

## Commentary

- 437 Fishing for holes in transporters: How protons breach the Na/K pump security gates. Donald W. Hilgemann  
443 Novel coupling is painless. Ann R. Rittenhouse

## Research Articles

- 449 Route, mechanism, and implications of proton import during Na<sup>+</sup>/K<sup>+</sup> exchange by native Na<sup>+</sup>/K<sup>+</sup>-ATPase pumps. Natascia Vedovato and David C. Gadsby  
465 Differential Ca<sub>v</sub>2.1 and Ca<sub>v</sub>2.3 channel inhibition by baclofen and α-conotoxin Vc1.1 via GABA<sub>B</sub> receptor activation. Géza Berecki, Jeffrey R. McArthur, Hartmut Cuny, Richard J. Clark, and David J. Adams  
481 Mechanotransduction and hyperpolarization-activated currents contribute to spontaneous activity in mouse vestibular ganglion neurons. Geoffrey C. Horwitz, Jessica R. Risner-Janiczek, and Jeffrey R. Holt  
499 Stoichiometry of altered hERG1 channel gating by small molecule activators. Wei Wu, Frank B. Sachse, Alison Gardner, and Michael C. Sanguinetti

## Methods and Approaches

- 513 Sarcomere length nanometry in rat neonatal cardiomyocytes expressed with α-actinin–AcGFP in Z discs. Seine A. Shintani, Kotaro Oyama, Fuyu Kobirumaki-Shimozawa, Takashi Ohki, Shin'ichi Ishiwata, and Norio Fukuda
