

General Physiology is the study of biological mechanisms through analytical investigations, which decipher the molecular and cellular mechanisms underlying biological function at all levels of organization.

The mission of *The Journal of General Physiology* is to publish articles that elucidate important biological, chemical, or physical mechanisms of broad physiological significance.

Review

- 1 **The hitchhiker's guide to the voltage-gated sodium channel galaxy.** Christopher A. Ahern, Jian Payandeh, Frank Bosmans, and Baron Chanda

Research Articles

- 25 **Gating the glutamate gate of CLC-2 chloride channel by pore occupancy.** José J. De Jesús-Pérez, Alejandra Castro-Chong, Ru-Chi Shieh, Carmen Y. Hernández-Carballo, José A. De Santiago-Castillo, and Jorge Arreola
- 39 **R4496C RyR2 mutation impairs atrial and ventricular contractility.** Cecilia Ferrantini, Raffaele Coppini, Beatrice Scellini, Claudia Ferrara, Josè Manuel Pioner, Luca Mazzoni, Silvia Priori, Elisabetta Cerbai, Chiara Tesi, and Corrado Poggesi
- 53 **Nano-imaging of the beating mouse heart in vivo: Importance of sarcomere dynamics, as opposed to sarcomere length per se, in the regulation of cardiac function.** Fuyu Kobirumaki-Shimozawa, Kotaro Oyama, Togo Shimozawa, Akari Mizuno, Takashi Ohki, Takako Terui, Susumu Minamisawa, Shin'ichi Ishiwata, and Norio Fukuda
- 63 **High membrane permeability for melatonin.** Haijie Yu, Eamonn J. Dickson, Seung-Ryoung Jung, Duk-Su Koh, and Bertil Hille

Methods and Approaches

- 77 **bSUM: A bead-supported unilamellar membrane system facilitating unidirectional insertion of membrane proteins into giant vesicles.** Hui Zheng, Sungsoo Lee, Marc C. Llaguno, and Qiu-Xing Jiang
- 95 **Zinc flexes its muscle: Correcting a novel analysis of calcium for zinc interference uncovers a method to measure zinc.** Cheng Qian and Robert A. Colvin
